

## Civil War Arc

This Story Arc features the Civil War in the Marvel Universe between Iron Man's Pro-Registration forces (🛡️) and Captain America's Anti-Registration forces (🇺🇸). The first Giant-Sized Issue, Civil War Battles, kicked off the Civil War, and the second Issue focused on more Anti-Registration heroes. This third and final Issue of Arc will delve deeper into the Pro-Registration heroes, and villains!

## The Best Place in the Multiverse to Learn How to Play Vs. System® 2PCG® – Civil War Battles

The cards in this Civil War product, or Issue, have been specially designed and developed to be simple to play Vs. System® 2PCG® with. They're still powerful, fun, and thematic, and feature some of the most popular characters in Marvel comics.

However, if you haven't already, you'll need to seek out the Civil War Battles Issue. It will have all the counters and Locations you'll need, as well as cards and a rulebook developed especially

with new players in mind. Civil War Battles is the perfect place to learn Vs. System® 2PCG® or to teach the game to new players.

## AKA

Some characters, like ★Venom★, have **AKA** and another name in their text box (in his case it's **AKA Scorpion**). This represents the fact that some beings in the Marvel Universe have more than one name. In this case, Mac Gargan is the current Venom during Civil War, but he's better known as Scorpion!

In game terms, this means that characters with **AKA** count as having both names for both Uniqueness and Powering Up characters. So you can't have Scorpion and ★Venom★ on your side at the same time because they're both Mac Gargan!

**AKA** is not a power and so it can't be copied or turned off by anything that affects powers.

## Mantles

Some characters, like ★Venom★, share the same title or "mantle" with other people in the game. In cases like this, the newer character will have one or more stars before and after its name to differentiate it from its predecessor. The card's full name includes the star treatment so it will count as a different character for the purposes of Uniqueness. Since their names are

different, they can't be used to Power Up each other. But you could, for example, have Venom and ★Venom★ on your side at the same time because one is Eddie Brock and the other is Mac Gargan!

## Lady Deathstrike

Her **Adamantium Nails** ignore all effects increasing the DEF of the enemy characters in melee combat with her, even +1/+1 counters, and even effects that would resolve after the combat starts, like Plot Twists.

## Songbird

With her **Acoustikinesis**, if she chooses **Sonic Platform**, the effect will continue even if she's turned face down.

## Taskmaster

When he gains Keyword Powers from **Predict Physical Movement**, the character he gains them from doesn't lose them. (Taskmaster is just copying their powers.)

He **can** gain  and  as they are keyword powers. (They just use icons instead of text.)

He will also gain powers from **your** characters while he's meleé team attacking.

## Checklist
