Rush of Ikorr Developer Update and Banned & Restricted List 11/4/26

The following cards are banned in Rush of Ikorr. This means none of these cards may be registered in decklists for sanctioned events.

Banned

Chaac, Rainbringer ROI-108 R

Developer Notes

It's without question that summon abilities have continued to prove powerful and when they involve any sort of refreshing influence, that power multiplies greatly. In a continued effort to pull back the availability of refresh-based combos and avoid deep difference in time efficacy during non-combo turns, we have decided to ban Chaac. We want big boss monster style champions to be interesting but have found that that the influence rebate and combo potential of Chaac is just too much for the climate of the game at this time.
